THE SPIRIT OF DEMOCRACY.

Subscribe for Your County Paper—No Family Should be Without It.

It is one of the wonders of this age why an intelligent man will be year after year without his county paper. Generally the plea is that it costs too much, and at the same time the very man who makes this excuse will foolishly expend in one day's carousal ten times the subscription price of any paper published in the United States.

Ask a man who is not a subscriber to his county paper his opinion of the utility of a road in a distant part of the county. His reply will be: "Well, I don't take the Spirit, and not having heard the matter mentioned before, don't know what to think about it."

Ask your non-subscribing neighbor what he expects to receive per ton for his hay; per bushel for his wheat, corn, oats, and rye, and he will tell you he doesn't know anything about the market, but will enquire when he goes to town.

Ask your non-subscribing neighbor what he thinks about the Paris Exposition, the Negro question, the redemption of U. S. Bonds by an issue of greenbacks, the Military Bill placing the South under bayonet rule instead of civil authority, the Freedman's Bureau Bill, the conferring of the elective franchise upon the Negro, the unconstitutional acts of the Disunionists in power, and of things transpiring in his own immediate neighborhood and county, and his answer will invariably be: "I don't know; I don't take the Spirit, consequently am not posted."

THE HAIR.—Read what Elder D. T. Taylor, of Rouse's Point, N. Y., says on the hair. "The human hair, bleached by age, fright or disease, can be fully restored to its natural color without dyeing it. My case illustrates this statement truthfully. My hair for seventeen years has been gradually growing white and falling out, but, lo! in a short time I have back my old Auburn locks. My hair is as firm as when young; this has been accomplished by the use of Hall's Vegetable Sicilian Hair Renewer. It does its work rapidly, is cooling, healing, and, in my case effectually, without harm to brain, body, or general health; this cannot be said of any other preparation sold. I do not know the wonderful ingredients, but I do know experimentally, and by observation in a score of cases, that it is a most marvelously transforming compound. Heads of sixty-five are changed by it to the color of youth. The proprietors, R. P. Hall & Co., Nashua, N. H., will sell to clerghymen at wholesale prices."

The Directors of the Monroe Mutual Fire Insurance Company met at their office in Woodsfield, on the 20th inst. Present.—H. B. Hill, Chris. Warnick, F. Koehler, H. C. Kotschue, J. Judkins, Isaac Welsh, John M. Rownd, F. A. Lampert, Peter Diehl and John S. Way. Warren Hollister was appointed General Agent of the Company, with power to appoint Special Agents.

Upon consideration, it was concluded that a levy of 3 per centum, upon the premium notes, would be sufficient to pay losses, &c., of the Company.

The amount of property insured in the Company foots up \$1,369,372; amount of premium notes, \$200,398.

The Last Radical Joke.

The committee on Resolutions of the New Jersey Radical Convention, in its address, declared:

"We have restored the Union." "Well, yes, it looks like it, doesn't it? If the Union is restored, what are you doing with a new Reconstruction act? A Union of States and Military Districts. Austria and Hungary, Russia and Poland, England and Ireland. Offices for the Radicals, Suffrage for the Negro, and disfranchisement for everybody that refuses the Radical ticket. "A live man looked up in a sepulcher. A wired skeleton with a Radical wirepuller."

Accident.

One evening last week, as John McKee, living near New Jefferson, this county, was mowing grass with a Buckeye machine, his horse became frightened and he was pitched from his seat, falling in an exposed position. His arm was fearfully cut in two places. His sister-in-law, seeing the accident, ran to his assistance, and while endeavoring to unhitch the horses from the machine, a clap of thunder startled the animals, and giving a quick jump, brought the knife of the machine to one of her feet, severing it from her limb. When the doctors arrived her foot had to be amputated above the ankle.—Caldw. (O) Sentinel.

Boston, July 31.—Among the passengers per steamer China, which arrived last night, were Admiral Pegiboff, of the Austrian Navy, and his brother, General Pegiboff, en route to Mexico to obtain the body of Maximilian.

Auburn, N. Y., July 31.—The wounds received by Assistant Secretary Seward by the running away of a span of horses are not of a serious character. He will probably be well in a few days.

The Radicals are determined to run a negro for Vice President. What do you think of that, aspiring white men? Summer says that Senators must prepare to welcome black members to the Senate chamber.

The leading Mongrels of Congress have shown that they rejoice at the murder of Maximilian by the Mexican barbarians. The reason, perhaps, is, that the Mexican Mongrel population has negro blood in its veins, and Maximilian was a pure white man.

For the Ladies.

BONNETS FOR AUGUST.

Hats are now larger than bonnets; bonnets have steadily grown smaller as the season advanced, until they now consist of nothing more than a mere spray of flowers, selected to match the trimming of the dress, and laid on a light foundation of tulle.

This is the favorite style of dress bonnets at the fashionable watering-places, and with the transparent toilet of muslin girding, chambray gauze, and other delicate tissues, nothing can be prettier. With the white muslin toilets, of which a great many have been prepared for this month, these little floral head-dresses are especially charming, the flowers consisting generally of violets, forget-me-nots, pink daisies, and the like, selected with reference to the color of the ribbon with which the dress is trimmed.

We notice this season that bonnets are made more than usual to match the toilets. This has always been the French style, but until recently only a very few ladies have adopted it in this country. The reason for the change may possibly be found somewhat in the fact that ladies are now to a great extent their own milliners, and the small bonnets being easily made, and requiring little material, they can afford five or six, where they formerly had one, and not unfrequently make one to match every dress.

With a pearl gray silk, for instance, we have seen a large black Lima lace have worn a large black lace bonnet, trimmed only with leaves and bunches of red currants.

With a white muslin dress and palette, trimmed with blue ribbon, we have seen a little white muslin bonnet worn, lined with blue silk, and ornamented with blue ribbon, and barbe-like ends of Valenciennes lace.

A pretty effect was also produced by a costume composed of lilac silk, brocaded with white flowers, a white lace shawl, and a bonnet of lilac crepe, trimmed with white flowers, and having white lace strings.

Very small bonnets, made of rice straw, or fine white Italian straw, and beaded; but we do not consider this any improvement to them.

Bridesmaids now wear bonnets instead of veils, but have long tulle, divided and worn like a scarf on the sides of the bonnet, nearly enveloping the figure. This new mode answers very well for a wedding at church, but we prefer that bridesmaids in full-dress should only wear wreaths, leaving the veil to the bride, and the bonnet for accompaniments to a bridal traveling costume.

Hats for country wear are endless in shape and style. Some have long crowns and narrow brims, and are trimmed by twisting a lace scarf around them, which hangs down at the back.

Straw fringes are much used upon the edges of round hats, bands of feather trimming are very common. There are two shapes in country hats with large brims; one is the Shepherdess, a low-crowned hat with a wide brim, often trimmed with a single plait of velvet, one end hanging down behind; the other, the Garden hat, so called, with a somewhat higher crown, and a deep brim sloping down in front and at the back, completely shading both face and neck. A wreath of leaves with small berries attached sufficiently ornaments this hat.

The proper hats for morning wear and for drinking water at the springs are dark gray, brown, or black straw. The black has a little band of curled feathers and cockade in front, the brown wreath of green, and the gray a wreath of Bismarck leaves.—Demorest's Magazine of Fashion.

The Way the Money Goes.

The Journal owes up that "about sixty millions of dollars are annually lost to the Government through the corruption and incompetency of the 'revenue officers.' Twenty millions of dollars are paid the National Banks to furnish the people a currency, when greenbacks would answer every purpose. Here in two matters alone the government loses eight millions of dollars each year—more than to carry on the Government each year under Buchanan's administration. It is any wonder that the people complain of excessive taxation, and demand a change of rulers?—Statesman.

The public debt is going up at the rate of over twenty millions a month. This is only two hundred and forty millions a year! Cheap enough, certainly, for a grand experiment of turning white men into negroes, and changing the American into an African system of government.

Remember, you who are opposed to Negro Suffrage, that every candidate on the Radical ticket is pledged in favor of striking the word white from our Constitution, and forcing on us Negro Equality.

NOTICE.

The beautiful Piano Fortes of GROVES & Co., are deemed by all good judges to be the Ultima Thule of instruments of the kind.

We cannot suggest what is wanting to make a musical instrument more perfect, although we are slow to admit that the limit of improvement can ever be attained.

Before they had brought their Pianos to their present excellence they had submitted them to competition with instruments of the best makers of this country and Europe, and received the reward of merit, over all others, at the celebrated World's Fair. It is but justice to say that the judgment thus pronounced has not been overruled by the musical world.

Still, by the improvements lately applied by them to their Pianos, it is admitted that a more perfect instrument has been made. They have accordingly achieved the paradox of making excellence more excellent. Surely, after this, they are entitled to the motto, "Excelsior!" may29.
